Selling at Higher Levels Turns 23,800 Into Key Barrier for Nifty

Benchmark Nifty ended a choppy week 2.2% down at 23,643 after two consecutive weeks of gains, weighed down by rupee depreciation and elevated oil prices. The index fell below its 50-day moving average of 23,800, a key short-term average that could now act as an immediate hurdle amid selling at higher levels, analysts said.

NAGRAJ SHETTY

SENIOR TECHNICAL RESEARCH ANALYST, HFC SECURITIES

Where is Nifty headed this week? Nifty slipped into minor weakness amid range-bound movement as a small red candle with an upper shadow was formed on the daily chart, indicating choppy movement in the market and the emergence of minor weakness near the crucial resistance of 23,800, as per the change in polarity. On the weekly chart, Nifty formed a long bear candle with a long lower shadow, signalling the emergence of buying interest around the 23,200 level during a week trend. The index is expected to oscillate within a broader range of 23,800-23,200 levels this week.

Trading Strategies: Lacklustre movement is likely to continue this week within the 23,800-23,200 range. One may look to buy Nifty May futures on dips around 23,250-23,200 for an upside potential of 250-300 points, with a stop loss at 23,100 this week. Also, one may look to short Nifty May fu-

TOP STOCK BETS

Indus Towers Buy | CMP: ₹428 | Stop loss: ₹415 | Target price: ₹455

After witnessing a range-bound weakness over the last few weeks, the stock has broken out of the range and closed above the downward-sloping trendline at ₹428. Expanding volumes and a positive daily RSI signal are improving momentum in the stock.

Samvardhana Motherson International Buy | CMP: ₹130 | Stop loss: ₹124 | Target price: ₹140

The stock has been moving up steadily over the last few months, forming a bullish pattern of higher tops and higher bottoms on weekly chart. Support from the 10-day and 20-day EMAs, along with positive volume and RSI signals, indicates a favourable near-term outlook as the stock approaches the key breakout zone of ₹133-35.

NILESH JAIN

VP & HEAD OF TECHNICAL AND DERIVATIVE RESEARCH, CENTRUM FINVERSE

Where is Nifty headed this week? Nifty ended the week below its 50-DMA, placed around 23,800 level. The stock formed a strong base and gave a breakout from a descending triangle pattern. Momentum indicators and oscillators have also given a weak near-term undertone.

Trading Strategies: Jain recommends deploying a Bear Put Spread in the upcoming weekly expiry. Buy 1 lot of 23,600 Put at 133 Sell 1 lot of 23,400 Put at 70

This results in a net debit of 63 points, with the stop loss at 20 points. The maximum loss will be capped at ₹2,795. The strategy offers a maximum profit potential of 137 points per lot, or ₹5,905, while the breakeven point is placed at 23,463.

TOP STOCK BETS

Indus Towers Buy | CMP: ₹430 | Stop loss: ₹413 | Target price: ₹460

The stock witnessed a gradual upmove and crossed its immediate hurdle at 21-DMA around ₹434, while continuing to trade above its short- and long-term moving averages. Strong volumes alongside the recent price action indicate sustained buying interest and reinforcing the bullish undertone.

Arvind Limited Buy | CMP: ₹451 | Stop loss: ₹425 | Target price: ₹495

Arvind has given a major breakout above the 410-430 zone on monthly chart after a bullish Pole and Flag pattern. The stock has also given a consolidation breakout above ₹450 on the daily chart, and follow-up buying could trigger the next rally towards ₹495.

Arvind Limited Buy | CMP: ₹451 | Stop loss: ₹425 | Target price: ₹495

Arvind has given a major breakout above the 410-430 zone on monthly chart after a bullish Pole and Flag pattern. The stock has also given a consolidation breakout above ₹450 on the daily chart, and follow-up buying could trigger the next rally towards ₹495.

Traders are advised to buy one lot of the 23,700 Strike Puts and simultaneously

sell one lot of 23,400 Puts. Maximum risk in the strategy is 115 points, or ₹7,475 per lot, while the maximum potential profit is 185 points, or ₹12,025 per lot, if the index expires below the 23,400 zone towards the monthly expiry.

TOP STOCK BETS

sun Pharmaceutical Industries Buy | CMP: ₹1,878 | Stop loss: ₹1,820 | Target price: ₹2,000

The stock has formed a bullish Pole and Flag pattern on the daily chart, indicating continuation of the ongoing uptrend. Strong support near the ₹1,820 zone, firmness in the Nifty Pharma index and a rising ADX line suggest further upside towards the ₹1,950-2,000 range.

Arvind Limited Buy | CMP: ₹451 | Stop loss: ₹425 | Target price: ₹495

Arvind has given a major breakout above the 410-430 zone on monthly chart after a bullish Pole and Flag pattern. The stock has also given a consolidation breakout above ₹450 on the daily chart, and follow-up buying could trigger the next rally towards ₹495.

Traders are advised to buy one lot of the 23,700 Strike Puts and simultaneously

sell one lot of 23,400 Puts. Maximum risk in the strategy is 115 points, or ₹7,475 per lot, while the maximum potential profit is 185 points, or ₹12,025 per lot, if the index expires below the 23,400 zone towards the monthly expiry.

Arvind Limited Buy | CMP: ₹451 | Stop loss: ₹425 | Target price: ₹495

Arvind has given a major breakout above the 410-430 zone on monthly chart after a bullish Pole and Flag pattern. The stock has also given a consolidation breakout above ₹450 on the daily chart, and follow-up buying could trigger the next rally towards ₹495.

BHARTI TO TRIM STAKE TO 25%, WHILE 360 ONE TO OFFLOAD ENTIRE 15% British Insurer Prudential to Buy 75% in Bharti Life for ₹3,500 Cr

Our Bureau

Mumbai: British insurer Prudential has agreed to acquire a 75% stake in Bharti Life Insurance for ₹3,500 crore to take management control of an Indian life insurance company for the first time.

Bharti Enterprises will sell its stake in the company to 25% from 85% while 360 One Asset Management will sell its entire 15% holding and exit the venture, the companies announced on Sunday.

Regulatory approvals for the transaction are expected to require Prudential to reduce its shareholding in ICI Prudential Life Insurance Company to below 10% from 22%, now the insurer said, adding that it is in discussions with regulators on the timeline and process for the divestment.

"India is a strategically important and exciting market for Prudential," said Anil Wadhvani, CEO of Prudential Life. The insurer also has a 35% holding in ICI Prudential Asset Management Company. Separately, it is also setting up a standalone health insurance venture in India with the ICI Group with operations expected to commence in 2026 subject to regulatory approvals.

Prudential said the ₹3,500 crore transaction will be funded through existing resources, noting that the holding company had cash and short-term investments of ₹1.3 billion, or about ₹1,290 crore, as of December 31, 2025, alongside a group leverage ratio of 13% and a free surplus ratio of 21%.

Part of the proceeds from any future divestment in ICI Prudential Life could be used to support growth in the India business, the company said.

"This partnership opens new opportunities for Bharti Life's employees and further reinforces the strategic relationship between India and the United Kingdom," said Sunil Bharti Mittal, founder and chairman of Bharti Enterprises.

SLIGHTLY RAISED OFFER STILL BELOW LIQUIDATION VALUE OF ₹880 CR Only Ambuja Cement in Fray for Jaypee Cement at ₹580 cr

Lenders to 'vote for liquidation' if talks with Adani don't bring higher bid

Deal Corner

Jaypee Cement is an affiliate of Jaypee Associates (JAL). NCLT has approved Adani's plan to buy JAL. Of this, ₹2,892 cr from secured creditors and ₹689 cr from unsecured creditors due.

RP has admitted ₹3,361 cr of claims from lenders.

Adani Group-backed Ambuja Cements has submitted a ₹580 crore offer to acquire bankrupt Jaypee Cement, an affiliate of Jaypee Associates, according to people aware of the matter.

The only other bidder, My Home Group, exited the process after submitting an offer of ₹300 crore.

However, the insolvency resolution process will be completed by a fine balance, as the Ambuja offer is well below the liquidation value of ₹880 crore.

Lenders are negotiating with the Adani Group to further raise the offer. "If the bid is not im-

proved, one of the people said. Lenders had conducted a challenge auction for Jaypee Cement with a base price of ₹582 crore, which was Ambuja's pre-auction offer. The Adani Group subsequently increased its bid to ₹580 crore. The revised offer is 5.7% of the admitted claims of creditors.

The Adani Group and resolution professional (RP) Deepika Bhatnagar do not respond to ET's request for comment.

India's Run as Market Darling May be Over

India stands out as one of the biggest losers as the artificial intelligence trade reshapes global investment flows. In a stark shift, the country's stock market is on the verge of dropping out of the world's five biggest for the first time in three years. Without the AI-driven rallies powering Taiwan and South Korea, there's a growing risk that India falls further behind rather than regaining lost ground. The ratio

nales goes far beyond Indian equities being relatively expensive or corporate earnings slowing. Global investors, who not long pushed India close to rivaling China in emerging-market portfolios, are now chasing themes the country's market largely lacks: chip manufacturing, computing infrastructure and AI models. — Bloomberg

Notes:-

- The Consolidated and Standalone Financial Results for the quarter and year ended on 31 March 2026 have been reviewed by the Audit Committee and approved by the Board of Directors at their meeting held on May 16, 2026.
- The Board has recommended the final dividend of Rs. 1.75 per share (i.e. 87.50% on equity shares (face value of Rs. 2 each), subject to approval by the shareholders at the Annual General Meeting. In terms of regulation 42 of the SEBI (LODR), the Board has fixed 29 May, 2026 as the "Record Date" for the purpose of ascertaining the eligibility of shareholders, for the payment of final dividend. In terms of SEBI Regulations 2025 (amended on November 18, 2025), payment of dividend through cheque/electronic mode has been omitted. Shareholders are requested to update their KYC & bank account details with the Company/RTA to enable electronic payment of dividend(s).
- The above is an extract of the detailed format of the financial results of the company for the quarter and year ended on 31 March 2026 filed with stock exchanges pursuant to Regulation 33 & 52 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015. The full format of both these results (standalone and consolidated) are available on the stock exchange website(s) i.e. NSE website (www.nseindia.com), BSE website (www.bseindia.com) and on Company's website (www.unominda.com).
- For exceptional and the other line items referred in regulation 52(4) of the Listing Regulations, pertinent disclosures have been made to the Stock Exchange(s) (NSE & BSE) and can be accessed on the NSE website (www.nseindia.com), BSE website (www.bseindia.com) and on Company's website (www.unominda.com).

'India, Others May Pursue Bilateral Energy Deals'

New Delhi: India and other oil importing nations are likely to negotiate bilaterally to secure energy supplies potentially through coordinated transit corridors...

Moody's said there is little prospect of a swift and durable settlement between the US and Iran and with the full reopening of the Strait of Hormuz.

Moody's said that the transit flows will gradually improve, but through bilateral channels rather than a general reopening.

We expect oil importers - particularly China, India, Japan and Korea - to negotiate passage bilaterally with Iran, potentially through coordinated transit corridors such as the reportedly emerging near Larak Island through Omani territorial waters...

Moody's said even if safe passage in the Strait were to resume in the next six months, the oil market would remain supply-constrained, with persistently higher and more volatile energy prices and broader knock-on effects through costs, demand and financing conditions for export borrowers.

Moody's said even if safe passage in the Strait were to resume in the next six months, the oil market would remain supply-constrained, with persistently higher and more volatile energy prices and broader knock-on effects through costs, demand and financing conditions for export borrowers.

QUESTIONING MOVEMENT TO 'BONA FIDE BIZ'

RBI tightens ODI Scrutiny

Mumbai: Amid austerity calls to conserve hard currency, regulatory authorities are scrutinising whether India's overseas direct investments (ODI) have gone into 'bona fide businesses'.

As asked to explain intent, governance, fund use behind ODIs as outflows surge to \$27b

Over past few weeks, at least two corporates must receive questionnaires from the regulatory authority on ODI matters.

The RBI spokesperson did not respond to ET's queries. A company or limited liability partnership (LLP) can annually remit up to four times its net worth for ODI, provided the investment is bona fide business activity.

SUPPLY DIVERSIFICATION

India must avoid the supply chain vulnerabilities currently being witnessed globally, Singh says

BoP Stability Tested by Outflows & Re Fall

India's external account is coming under pressure with both current and capital accounts facing stress. Current account deficit is expected to widen, while capital account may see high outflows.

Higher energy prices widening trade deficit. AI risks to services export growth. West Asia conflict threatening remittances.

Table showing Current Account Balance for FY23, FY24, and FY25. Values are in \$ bn and as % of GDP.

CAD TO RISE ABOVE 2% IN FY27

Table showing CAD projection for FY27 as % of GDP. Values are 2.1, 2.1, 2.2, 2.4 for different agencies.

POLICY PRESCRIPTION

If additional pressure on Re emerges, the RBI could consider range of measures, including reopening a currency swap window for OMCs.

Policy action outside conventional rate hikes will be tapped to anchor the currency, including removal of withholding tax for foreign investors in sovereign bonds.

More than the widening current account deficit, it's the shrinking capital account surplus expediting on BoP.

India, Other Oil Importers to Bilaterally Negotiate Transit Corridors with Iran, says Moody's Report

New Delhi: India and other oil import nations are likely to negotiate bilaterally to secure energy supplies, potentially through coordinated transit corridors.

Moody's said the transit flows will gradually improve through bilateral channels rather than a general reopening.

opaque and subject to interruption. "We expect oil importers — particularly China, India, Japan and Korea — to negotiate passage bilaterally with Iran, potentially through coordinated transit corridors such as those reportedly emerging near Larak Island and through Oman territorial waters.

EXPLORING FRESH PRODUCT & COUNTRY COMBINATIONS

Exports Diversification Drive Adds \$22 m to Kitty in FY26

While ships, boats, telecom gear, pulses, marine goods, graphite & explosives gave a boost to trade, there was growth across NE Asia, Africa and LatAm

Kirtika Suneja

New Opportunities

Product	No. of Countries	Value (\$ m)
Handloom Products	29	0.3
Other Oil Seeds	24	2.7
Accumulators/Batteries	22	2.3
Bicycle & Parts	22	2.3
Office Equipment	21	0.8
Telecom	20	5.9
Ship, Boats	19	0.7
N-reactors, boilers, parts	13	14.2
Two, three wheelers	13	4.2
Pulses	18	4.1
Aircraft, Spareparts, Parts	17	22.1
Gold, Precious Metal Jewellery	17	4.4

New Delhi: Ships, boats, telecom instruments, pulses, marine goods, graphite and explosives drove India's export diversification strategy last fiscal year, with new product and country combinations generating new exports worth \$20.2 million.

As per an analysis done by the commerce department, India's export diversification in FY26 was marked by a significant widening of its product market footprint, with Indian exporters penetrating 1,821 new principal commodity product and country combinations.

Ships, boats and floating structures generated \$57 million of additional exports from 219 new markets, while telecom instruments expanded into 20 new markets with exports of \$8.3 million and nuclear reactors, industrial boilers and parts garnered \$14.3 million

from 13 new markets.

The trend highlights a gradual shift from traditional commodity-based export to broader participation across high-value manufacturing, engineering, agri-processing and technology-intensive sectors, said an official.

New Delhi also added 17 new countries for its gold and jewellery exports, and 19 new destinations for silver exports.

The highest number of new markets were added for handloom products, followed by other oil seeds.

matrice from India seeing rising demand across new destinations. Emerging sectors such as aircraft and spacecraft parts, and consumer electronics also gained traction in new markets.

Geographic diversification showed growth across Asia, Africa and Latin America although North America continued to dominate India's export basket with shipments of \$97.7 billion, or 21.6% of the total exports.

The strongest momentum came from Northeast Asia, where exports surged 21.6% to \$41.6 billion, raising the region's share to 9.4% of India's total exports.

"Seven out of the eight countries in the region recorded positive growth, highlighting rising demand for Indian electronics, engineering goods, chemicals and industrial products across the region," the official added.

NTPC Chief Against Reliance on One Source for N-tech

Our Bureau

New Delhi: NTPC chairman and managing director Gurdeep Singh said that over reliance on any single supplier or country for nuclear technology should be avoided, asserting the need to prioritize control over technology and resources, even if domestic options are 5-8% costlier in the initial stages, according to a recent report published by the Central Electricity Authority on workshop on the SHANTI Act held in April.

India's largest power producer has committed 30 GW capacity by 2047, while that of the country's target is 100 GW by 'Viksit Bharat'.

SUPPLY DIVERSIFICATION

India must avoid the supply chain vulnerabilities currently being witnessed globally.

For a large-scale power producer like NTPC, the focus must remain on large capacity reactor sets rather than small modular reactors, which are suggested might be better suited for captive industrial use despite their high structure costs, as per the report.

He stressed the need for greater public outreach and site visits to improve awareness around nuclear safety.

Ensuring long-term fuel security for nuclear plants, which are designed to operate for more than 60 years, is a critical requirement of the sector's expansion, he said. He also advocated repurposing retiring thermal power plant sites for nuclear projects, saying these locations already have key infrastructure such as land, water access and grid connectivity, which could help reduce project risks and speed up implementation.

Shipments to Latin America rose 7.8% to \$16.4 billion, contributing 3.7% to the country's total exports.

"Shipments to Latin America rose 7.8% to \$16.4 billion, contributing 3.7% to the country's total exports."

QUESTIONING MOVEMENT TO 'BONA FIDE BIZ'

RBI Tightens ODI Scrutiny

RBI Flags ODI Surge

RBI is scrutinising whether Overseas Direct Investments (ODIs) are flowing into "bona fide businesses"

COMPONENTS OF ODI

Equity Investments, Loans, Invoked guarantees

TOP ODI DESTINATIONS

Singapore, United States, UAE

Cos asked to explain intent, governance, fund use behind ODIs as outflows surge to \$27b

Sugata Ghosh

Mumbai: Amid austerity cry for calls to conserve hard currency, regulatory authorities are scrutinising whether India Inc's overseas direct investments (ODI) have gone into "bona fide businesses."

The RBI's foreign exchange department is asking companies to explain the choice of jurisdiction, performance and economic outcomes of overseas investments, risk management practices, future capital commitments, control mechanisms, and intermediate holdings entities and subsidiaries.

Remittance Scheme (LRS), under which individuals can send up to \$25,000 per year, is being used to fund ODI, rules allow borrowing. For instance, a company with a net worth of \$100 crore can invest up to \$30 crore and make a \$40 crore ODI. The scope and size of remittances under ODI has therefore far larger than under LRS, which is capped at \$25,000.

"Since most ODIs are routed through Singapore or Dubai SPVs for tax efficiency, RBI is keen to know whether companies are parking their profits in offshore entities or fees from ODIs at the Singapore or UAE level," said a person aware of the regulator's actions.

A senior banker said he would not be surprised if some ODI approval mechanism and stricter reporting requirements are introduced to curb misuse.

Companies should expect closer monitoring to ensure that the rationale, governance and structure remain appropriate and that the value of investments is protected, Laitin said.

Clear documentation, business plans and board records will be critical, he added.

Over the past few weeks, at least four companies have received RBI questionnaires on past ODIs.

A "bona fide business" is one permitted under the laws of India and the destination country. Unlike the RBI's Liberalised

Remittance Scheme (LRS), under which individuals can send up to \$25,000 per year, is being used to fund ODI, rules allow borrowing. For instance, a company with a net worth of \$100 crore can invest up to \$30 crore and make a \$40 crore ODI. The scope and size of remittances under ODI has therefore far larger than under LRS, which is capped at \$25,000.

India, Other Oil Importers to Bilaterally Negotiate Transit Corridors with Iran, says Moody's Report

PTI

New Delhi: India and other oil importing nations are likely to negotiate bilaterally to secure energy supplies, potentially through coordinated transit corridors, but a return to pre-war traffic volumes is unlikely by 2026, Moody's Ratings has said.

In a global report on geopolitical risks, Moody's said there is little prospect of a swift and durable settlement between the US and Iran and

with it the full reopening of the Strait of Hormuz.

Moody's said the transit flows will gradually improve, but through bilateral channels rather than a general reopening. This would allow some incremental improvement in energy transit flows from near-zero, but the process will be slow,

opaque and subject to interruption. "We expect oil importers — particularly China, India, Japan and Korea — to negotiate passageway bilaterally with Iran, potentially through coordinated transit corridors such as those reportedly emerging near Larak Island and through Oman's territorial waters. A return to pre-conflict traffic volumes in 2026 is unlikely," it said.

Moody's said even if safe passage in the Strait were to resume in the next six months, the oil market would remain supply-constrained.
